Career Objectives

I have always had a passion for coding and web development. I am looking to achieve an entry level web full stack web development position. When looking at my past experience I have reflected that I am able very self-disciplined when it comes to learning new systems and practices. I believe this is important when it comes to switching my career and entering into the technology industry.

Preferred work location

I am able to work remote and in office.

Project Portfolio

Portfolio Website

<http://morobmportfolio.com/>

- This is my handmade portfolio website that contacts my resume, projects and downloadable codes.

NTX Move-in Email

<https://github.com/morobm1/NTX-Move-in>

- This project is an HTML email campaign that was requested for an apartment complex's move-in day. The main features of the request was a drop down style FAQ section as well as an image slider that would display a residents options to pay rent. This project contains integrated CSS.

Contact me form

<https://github.com/morobm1/Contact-me>

- This project is personal contact me form created with html and external css. This project also utilities formspree.io to post the request to an email server.

Fictional Shop Homepage

<https://github.com/morobm1/E-shop>

- This project is an exercise in creating a home page for a shopping website. The main focus was to practice creating an overall on featured images.
